

## **E- Safety - Safeguarding Children in the Digital Environment**

**COURSE TIME:** 9.30 am – 1.00 pm

**COURSE DURATION:** Half day

**COURSE PRESENTER:** Training Pool

### **Aim**

The internet and other digital technologies are hugely valuable tools. At the same time they can increasingly pose risk of abuse to young people through bullying, sexual exploitation, contact with child sex offenders etc.

### **Learning outcomes**

- What young people need to know and do to protect themselves
- What professionals working with young people need to do to reduce risk and respond appropriately when an incident occurs
- What policies and processes need to be in place within your organisation
- Updating about new technologies including games and new devices
- Resources for parents about how to keep children safe and parental settings

The course addresses all of these issues in a stimulating and interactive way. You don't need any prior knowledge of e-safety issues to join us but you should be in a position to be able to act upon the knowledge that you gain.

### **Target Audience**

- Practitioners with safeguarding responsibility
- IT professionals based in any children's environment
- Anyone working with young people who is in a position to cascade the information within their organisation.
